

***FACIAL AGING: MEDICAL, SURGICAL AND ODONSTOMATOLOGICAL SOLUTIONS.
OEO FIRENZE 2012 (Italian and English)***

It is the most recent publication written by Prof. Redaelli Alessio.

It extensively treats all the techniques of facial rejuvenation.

After an extensive discussion of the anatomic parts (it is always useful to remind the important details during the treatments), the book presents all the techniques divided by area.

All the aesthetic medicine part is accompanied by specific clinical cases explained, as always in Prof. Redaelli's books, in a very practical and exhaustive way, with lots of pictures that allow the readers, doctors and odontostomatologists to try the techniques the day after.
